

Secondary Glazing Systems

WE SUPPLY - YOU DIY

Tubeway supply a comprehensive choice of cost effective secondary double glazing products, designed for easy installation by any DIY enthusiast, and not requiring any special tools to fit. Each product allows you to insulate your windows against heat loss and draughts, as well as noise, and the range offers a choice of using either plastic glazing sheet or glass. All Easyfix® secondary glazing systems are suitable for removal in warmer weather and later re-installation, with some allowing repeated easy access suitable for daily ventilation without removing.

Remember to draught-proof your windows, doors and letterboxes using Easyfix® draught excluders, to enhance the benefits gained by secondary glazing.

WHICH SECONDARY GLAZING SYSTEM TO CHOOSE?

Whatever your glazing requirements, there is a system to match them. Here is a quick summary of the **8 Easyfix systems**, and their main features:

CLIPGLAZE FLEXIBLE EDGING

- Glass or plastic sheet
- Turnbutton removal
- Screwed to frame
- 2mm to 6mm glazing
- Install inside or out

Flexible edging channel in clear, brown or white which is easily mitred for a neat finish and held in place with the glazing sheet, by nylon clips that are screwed to the window frame. The Clipglaze system is available in handy 5m and 15m kits, or with each component part separate, and is made in 2mm, 3mm, 4mm, 5mm and 6mm channel widths.

Tubeway have made and supplied this system continuously for 50 years!

SUPERGLAZE RIGID EDGING

- Glass or plastic sheet
- Smart appearance
- Screwed to frame
- 3mm or 4mm glazing
- Install inside or out

Superglaze is a 2 part rigid PVC system suitable for 3mm and 4mm glass or plastic sheet. Lengths of extrusion grip the edge of the glazing material before being attached to the window frame or surround with screws. The screws are hidden with a slide in cover strip, and the corners can be mitred for a smart professional appearance. Available in 2.44m and 1.22m lengths, white or brown.

EASYGLAZE 2 PART RIGID EDGING

- Plastic sheet only
- Self-adhesive fixing
- Smart appearance
- 2mm glazing

Easyglaze is an alternative rigid 2 part diy glazing system that fixes to the window frame with double sided tape, and after adding

plastic glazing sheet, a top section is press fitted to hold it in place and complete the neat and professional appearance. Easyglaze can be mitred to form a frame. Available in 2.44m and 1.22m lengths, white or brown.

TURN OVER FOR THE OTHER GLAZING SYSTEMS

MAGNETGLAZE MAGNETIC STRIPS

- Plastic sheet only
- Steel strip stuck to frame
- Magnetic strip attach to sheet
- 2mm to 4mm glazing
- Cosmetic trims available

Magnetglaze is a quick removal system for plastic sheet only that uses a magnetic strip on the glazing that attaches to a metallic strip on the window surround. This product can be supplied in 5m kits or 30m bulk rolls in convenient dispensing packs. Easy to use and install, simply lift the panel off the window when access is required. Visible parts, once fitted, are white.

MAGNETGLAZE PRO RIGID EDGING

- Plastic sheet only
- Steel strip stuck to frame
- Magnetic strip is attached to plastic edging
- 2mm to 4mm glazing
- Neat appearance

Using the same steel magnetic system as Magnetglaze, Magnetglaze Pro has a smart rigid plastic edging that will neatly mitre to frame the glazing sheet but still allowing easy removal. Available in 2.44m and 1.22m lengths, white or brown.

MAGNETGLAZE SASH MULTI-PANEL KITS

- 2mm Plastic sheet only
- Uses basic Magnetglaze system with extra features
- Repeated removal of glazing sheet possible
- Ideal for sash windows

Specifically designed for sash windows, where daily ventilation and night-time noise and heat insulation are required, Magnetglaze Sash has a jointing strip that allows part of the panel to be removed and stored on the face of the other panel for convenience. Visible components are white.

TRACKGLAZE SLIDING SYSTEM

- Glass or plastic sheet
- Components are self-adhesive & sticks within window cavity
- Smart and easy to use
- Versatile design for 4mm glazing

Trackglaze is a smart and easy to install system that gives instant access to your outer windows via simple slide opening. It uses Double Sliding track on all 4 sides of the window cavity, Bristle Seal draught excluder on the edges of each glazing sheet and an Angle for a finger-pull handle. All components are self-adhesive. Packs have 2m or 1m lengths, in white or brown.

FILMGLAZE HEAT-SHRINK SYSTEM

- Thermal film
- Self adhesive
- Cost-effective
- Quick to install

Filmglaze uses a sheet of thermal film that is fixed to the window surround using double sided tape. Once fitted the film is stretched by gentle use of a hairdryer to give effective and low cost winter insulation and draught proofing. Sticky tape and film are clear / transparent once installed.
